

VIRSAT®

VIRTUAL REALITY SAFETY TRAINING

Life Saving Rules

Management in the oil and gas industry can significantly reduce fatalities by 71% through the implementation of Life-Saving Rules. Major companies in this sector have successfully demonstrated this approach, saving numerous lives over the past decade. The International Association of Oil and Gas Producers (IOGP) has now streamlined and standardized these rules, making them accessible to all companies in the industry. Many companies are adopting the IOGP Life-Saving Rules, and VIRSAT has developed the **Driving Aware All Roads™** training program to facilitate their effective implementation.

Driving Aware All Roads™

To ensure effective implementation of driving regulations, it is crucial that workers are well-versed in and understand the rules. VIRSAT offers a highly effective training solution for this: the **Driving Aware All Roads™** program.

Delivered through Virtual Reality Headsets, the **Driving Aware All Roads™** training is an engaging tool designed to educate drivers and enhance their commitment to safe driving practices. By participating in this immersive experience, drivers gain a thorough understanding of road safety rules. This training underscores the idea that fun and safety can effectively coexist, promoting a culture of safe driving among employees.

Innovative Learning

- Exceptional learning method
- Engaging workers
- Wins hearts and minds
- Learn through making mistakes
- Continuous learning made easy
- Learner mindset

What's New?

- Significant safety improvement
- Far lower training costs
- Workers like it
- Significant CO2 emission reduction

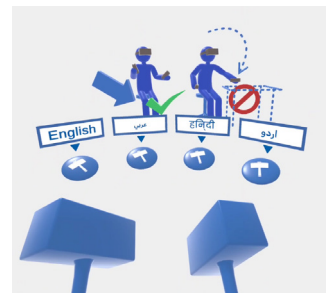

What is Different?

- No need to travel
- Exciting training
- Faster training
- All levels of learning ability addressed
- Industry standard content

Care-Free

- Headsets
- Training content
- Logistics
- Training records

Less Cost

- No instructor needed
- No travel time and cost
- Better recollection and understanding

ESSA Approach

<p>ELIMINATES the need to develop training material in-house</p>	<p>SIMPLIFIES the training concentrating on the essential core</p>	<p>STANDARDISED, applies industry standard approach</p>	<p>AUTOMATE delivered with VR headset</p>

Benefits of Driving Aware All Roads™ Training

Superior Recollection and Understanding

The design of the **Driving Aware All Roads™** training goes much deeper than fun. Recollection and understanding of the rules are boosted in multiple ways:

- Visual presentation of the rules
- Animations to explain the issues in the field
- Physical interaction where players need to “hammer down” the right answers
- Sound and vibrations providing feedback on the user interaction
- High-energy game playing holds the attention
- The rules are spoken and written are given in the native language of the worker
- Competitive element encouraging replaying to improve
- Completing the Driving Aware All Roads training ensures the Life-Saving Rules are known, understood, and recognized in the work environment.

Exceptional Learning Method giving Increased Employee Performance

The **Driving Aware All Roads™** training is a big improvement over classical classroom training and e-learning.

- Distraction and multi-tasking reduce by 38%
- Willingness to act increases by 40%
- Training time reduces by 40%
- Staff has the willingness to play the game without being told to do so
- Completing the game ensures the staff know the rules, 100%
- No worker is left behind. All levels of learning abilities are supported

Extensive Training Packages Available

We can deliver the industry standard **Driving Aware All Roads™** to your contractor companies as well. This ensures that all workers at your site, employee and contractors, are fully aligned to deliver safety.

Sustained Training

Workers are encouraged to do the training by having a headset available in different places like in the office or at work site. Many workers want to replay the game to improve their score. They can do the training as often as they want.

Logistics Savings

There is no need for workers to travel to a training centre. The **Driving Aware All Roads™** headset is mobile and can be used anywhere, anytime. Each worker can play the **Driving Aware All Roads™** training module individually and not necessarily in a group and in a designated place and time. If required, the game can also be provided on a PC, tablet, or smart phone.

Comprehensive Curriculum

The **Driving Aware All Roads™** training can be followed by VIRSAT’s knowledge level training for specific target groups, such as drivers, persons working in confined spaces, etc. This training is also delivered with the Virtual Reality Headsets. Other company-specific Learning from Incident Training that builds on the **Driving Aware All Roads™** training is also offered.

Care-Free

VIRSAT takes care of everything - the headsets, the training, keeping training records, etc. The **Driving Aware All Roads™** Training is offered at a fixed rate and offers unlimited training. Linking to your Learning Management Systems, utilising company headsets and other company specific requirements is also possible.

Demonstration

VIRSAT or one of our local partners can arrange for a demonstration of our training at your site.
