

Driver Merit System Module

Driver Merit System is a built in module in the FMS Office 2000 web based Fleet Management Software designed to measure drivers performance, reward them for good driving and console those who have unsafe driving habits. DMS captures each driver performance fairly and accurately to:

- Analyse each driver performance.
- Encourage safe driving.
- Improve driving behaviours.

- Improve drivers' safety awareness.
- Improve driver performance and productivity.
- Create positive and safe environment among drivers.
- Identify good and bad drivers.
- Award and discipline transparency.
- Driver appraisal system and competition to improve.
- Keep good drivers always motivated and penalties on those who resist to change.
- Create a reliable knowledge base for driver performance.

Tracking driver performance is an important and essential part of our FMS TECH Fleet Management Solution. Set your policy parameters and monitor in real time their performance. Insure your driver safety and analyze their habits. By using our FMS TECH platform you will be entitled as well on sending alerts or voice communication to your driver or to the dedicated supervisors to prevent any risk or violation.

BENEFITS OF THE DMS SOFTWARE:

- Violations & Accidents
