

FMS ADAS 360

The **FMS ADAS 360** is a 6 Channel Advanced Driver Assistance System for an evolution in vehicle sensing, intelligence and control that ensures total safety for the driver. It uses high level video analytics for detailed driver behavior, violations and identifying potential threats. This assists the driver to avoid risky situations and follow the rules and regulations for Road safety. **FMS ADAS 360** supports an embedded processor and Operating system along with built in GSM, Wifi & Bluetooth connectivity options. On board storage assures backup and data retention.

All the recorded data is sent to the dedicated FMS Tech. web based software which computes the received information and provides it to the end user in the desirable format. **FMS ADAS 360** can be integrated with external sensors and components from the vehicle along with FMS Tech. IVMS devices to get detailed telematics from the vehicle along with driver assistance.
