

# FMS Comstation 2K

The FMS ComStation 2000 is an accessory to the FMS line of products and devices from FMS-Tech. This device is required whenever the system admin need to issue Driver ID Card. The FMS ComStation 2000 is used with the FMS Center, or Track, or Trace line of products to write driver information on the Driver ID card. This device is a reader and writer to the Driver ID Card with single or dual chip technology. (Texas Instrument or Myfare, or both).

The FMS ComStation 2000 connects with any PC based computer or portable using USB cable that comes with it. The FMS System Administrator can use the FMS Office Enterprise Software to connect with the FMS ComStation for driver card issuance. The System Admin can write driver information including Driver ID, Driver License Expiry date, and driver work shift on the Driver ID card using the FMS ComStation 2000.
