

FMS Lite Trace 2K

The Lite Trace device is a simple high accuracy vehicle tracking device with main features being waterproof and an IP66 rating enclosure making it suitable for harsh weather and environments while being easy to install and configure. It is equipped with Global Navigation Satellite System (GNSS) which supports both GPS and GLONASS in order to provide high accuracy reporting down to 1 meter resolution. Through these systems the user can have notifications sent quickly to their computer or mobile device.

With the absence of RFID, CAN bus, and Ignition Relay, the device is ideally designed for a fleet manager needing a simple tracking solution. Optional expansions include supporting both WiFi and wireless 2.4 GHz Zigbee.

As with all of the FMS-Tech products, this device can easily be customized according to the application's specific needs and requirements.

KEY FEATURES:

- Device Ingress Protection (IP) rating of IP66 for usage in extreme climates and environments
- Accident Sensor compatible for advanced protection and performance
- Quad Band, GSM technology to enable quality usage world-wide
- Four inputs for sensor and accessory connections and readings
- Internal GNSS antenna for a more durable device
- Power consumption of 170 mA Bluetooth headset compatible to help encourage safe driving
- Proximity sensor is an additional add-on to increase safety and reduce accidents
- Live online tracking for continuous and accurate updates on vehicle location and telematics
